

The categories are disappearing to fast when scrolling down, it needs to become smoother

I don't want the cart to disappear when I scroll down

Can you make the login to my site identical to the one in this site (with our own Color and stuff like that)? I mean the login box popping up, and if the user does not have login yet or any social media, he gets redirected to a page similar to the one you have already Created

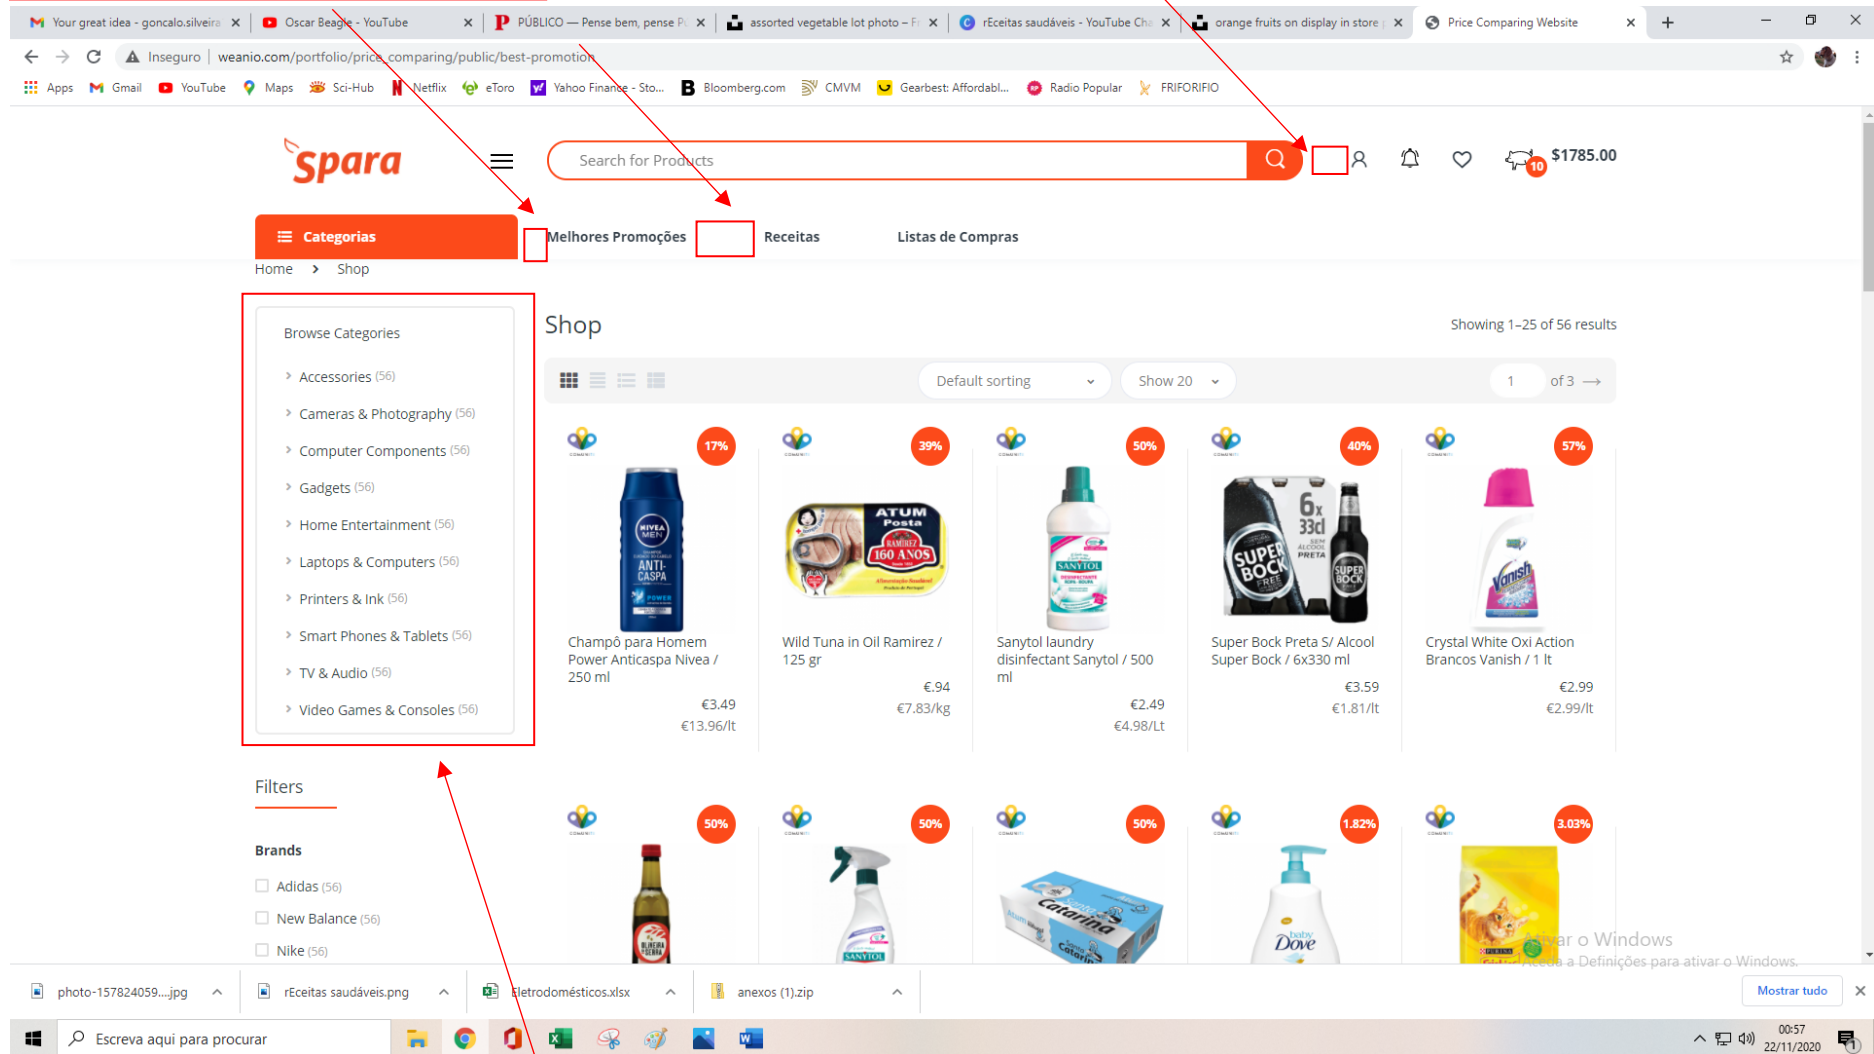

Can Sine we will make possible to the user reate multiple product lists, an we hange the prie to the bottom retangule, and the name of the list in the top retangule?

The first distance should be equal to the second one, or at least just a little bigger than it is now

Until the user logs in, there should appear here the sign in/register words

Remove this please
